

中文題目：C3 腎絲球腎炎合併多發性骨髓瘤，經週邊自體幹細胞移植後蛋白尿大幅改善

英文題目：C3 glomerulonephritis with multiple myeloma, a significant improvement in proteinuria after peripheral autologous stem cell transplantation

作者：廖健富，郭克林

服務單位：台北慈濟醫院腎臟內科

Background: C3 glomerulonephritis(GN) is very rare and key feature is C3 with little or no immunoglobulin and deposits in immunofluorescence. The cause of C3 GN is less known at present.

Methods:

A case report.

Result:

This case disclosed proteinuria was improved after multiple myeloma(MM) treatment of peripheral stem cell transplantation.

Conclusion:

We presented this case who seem hinted the association between C3 and MM.
